

Tsunami™ Accessories

Industrial Grade Heaters for Cold Climate Protection

If you are using a Moisture Minder® drain, Tsunami Separator™ or Tsunami Filter™ in a cold-weather application, you run the risk of the condensate freezing and causing total blockage of your air system. This is easily fixed by installing a heater on the drain end to keep condensate in a liquid form.

- Keep moisture and oil from freezing up
- Prevent freeze-ups down to -40° F
- Easy to install (can be retrofitted on existing units)
- Available in 3 voltages
- Recommended for all outside applications in cold weather locations

Band Heaters for 50 SCFM Tsunami™ Water Separator

Part #	Watts	Voltage
163-0644	50	120 VAC
163-0646	50	24VDC
163-0648	50	12VDC

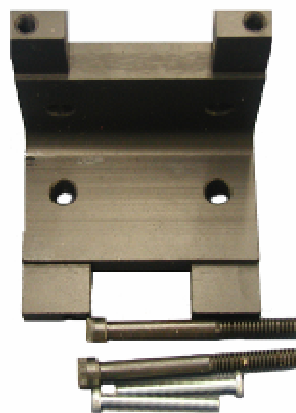

Band Heaters for 120 SCFM Tsunami™ Water Separator

Part #	Watts	Voltage
163-0649	50	120 VAC
163-0650	50	24VDC
163-0651	50	12VDC
