

Warning: Make sure compressed air system has been depressurized prior to installation of breathing air system.

P/N: 21999-0384

Single person breathing air system
shown complete with CO monitor & regulator on belt

Includes belt, regulator, carbon filter, CO monitor and belt mounted work hose

THE complete one person breathing air system.

This system runs a main hose to the person and then splits off a 6ft. work hose before entering the carbon filter/regulator. Provides Grade "D" breathing air with carbon monoxide monitor.

****Use only with electric driven compressors****

Mount the Tsunami unit.

Attach 50' hose to outlet of Tsunami unit, this hose attaches to the belt mounted activated carbon filter.
